Optima Film Discs

Technical Data Sheet

PRODUCT DESCRIPTION

The Optima Film disc is a general-purpose abrasive film product. Designed for matting and paint rectification of top and clear coat applications. It has a special stearate layer and a smooth film backing. For a perfect result, it is recommended to use with an Optima interface pad. This product is intended for dry sanding only.

INSTRUCTIONS FOR USE

- Always store the product in a dry environment, ideally 10°C to 25°C
- Always wear the relevant PPE safety equipment
- Always use in conjunction with a dust extraction unit
- For optimum performance and longevity of the abrasive disc, pre-clean the surface to be worked on if its dirty.
- Align dust extraction holes on the abrasive film disc to an Optima DA backing pad for maximum efficiency of dust removal
- Use a dual action sander with an orbit of 3-5mm to give the optimum surface preparation for topcoat applications or polishing
- On sharp contours to reduce breakthrough the Optima 150mm interface pad can be used

PRODUCT HIGHLIGHTS

- Aluminium oxide grain for optimum sanding and durability.
- Polyester film backing is highly resistant to tearing
- Extremely flexible
- Pigment free stearate coating prevents colour transfer and minimises clogging
- Produces a fine scratch pattern that is easy to polish out.
- 15 holes for maximum dust extraction (150mm)
- No holes (76mm)

PRODUCT DETAILS

Size:	150mm & 76mm
Grits:	P800 - P1500

TECHNICAL SPECIFICATIONS

Bonding:	Low VOC resin system
Grain:	Aluminium oxide
Colour:	White
Grit Range:	P800, P1000, P1200 & P1500
Backing:	Polyester film
